

A.O.2: The Cabœt bloodline

DL:1(breach of secrecy)

Containment procedures:

As of right now, the firstborn son of {Redacted} Cabœt has complied with the USACA and understands the anomalous properties behind his bloodline. The firstborn is to report to the Agency if he/she has received the effects of the bloodline's anomalous effects, or has given birth/has fathered to a firstborn; then the firstborn then must be registered as A.O.2-#(# represents the generation).

Description: A.O.2 is the bloodline of the Cabœt family. If a person with the bloodline(A.O.2-#) were to have a child for the first time. The firstborn (A.O.2-[#+1]) will receive the memories of their parent with said bloodline either when the parent expires or when the firstborn turns 18 years of age.

We have discovered this A.O when Brigadier General {Redacted} Cabot had expired due to a bullet wound. His eldest son, who was a communist sympathiser and received the effects of the A.O, went to eastern europe to negotiate a deal with the soviet union concerning his newfound knowledge. He was detained at an airport in London and promptly extradited to America to stand trial and be executed. During his interrogation however, he stated that he just somehow remembered the classified information, and went into detail about it, which had checked out. Considering that he had fathered a child, we had taken a D-class that was prepared to look like him and be executed by the state. The son was detained as A.O.2-1 and placed in humanoid containment. The child was to be monitored.
