

(A.O.8)“gilded arrow”
(Safe)

Containment Procedures:

(A.O.8) is to be contained in storage site [expunged]. One armed guard is to guard (A.O.8) at all times.

Description:

(A.O.8) is an arrow with an arrow head made out of an unknown metal. Supposedly, the metal originates from a meteor that hit in [Redacted]. Testing shows that it is considered indestructible by physical means. The origin of (A.O.8) is that it was discovered and collected by agent [Redacted] when passing through [Redacted].

Experiment-(A.O.8-1):

D-9875 was to be impaled by (A.O.8) using a modified compact bow and was to be given treatment for the wound. After treatment, D-9875 was to describe what he felt like. He reported see a humanoid figure appear from his body, he had also reported being able to perceive things very easily, having pin-point accuracy in all of our tests.

(Note: All tests had varied, from one person noting the ability to create life from in-organic material, to one person dying on the spot. We conclude that gaining an ability is not guaranteed, with dying on the spot. All D-class personnel that was tested on is to be considered ({A.O.8-1})and is to be placed in humanoid containment.)
