

USACA Experimentation: Scp-3580

References:

<http://www.scp-wiki.net/scp-3580>

{Refer to A.O.10}

Overview:

SCP-3580 is Euclid class SCP that is a set of jewelry which resemble jewelry used in Chinese betrothal wear. For now, we will focus on SCP-3580-a, which is a diamond-shaped locket. The effects of 3580-a is that the wearer, after an extended period of time, start to show symptoms of severe self-awareness, and will go to lengths of self-body mutilation to alleviate these feeling for a temporary amount of time.

Experiment Materials for USACA-SCP3580-1:

1x A.O.10-1

1x Standard full body mirror

1x SCP-3580-a

Rundown of experiment USACA-SCP3580-1:

Under the contract the SCP foundation has with the USACA, we are allowed to experiment on SCPs as long we provide the materials and resources. Through extensive negotiations, Major Secretary [Redacted] has managed to get O5-[Redacted] to lift bans on experimentations with SCPs as long we “Clean up our own damn mess.”

USACA Experimentation: Scp-3580

A.O.10-1 is to enter the chamber and wear 3580-a (with incentives). Then 10-1 will wait for approximately 10 hours (the test crew members are to maintain surveillance and should be switched out every 2 hours). After 10 hours has elapsed, the full body mirror will be introduced. A.O.10-1 is to gaze upon the mirror and communicate and unusual feelings (The A.O. is to maintain in that room and stay there until 3 hours has elapsed or by order of the Doctor on supervising the experiment).

Results:

A.O.10-1 had gazed at the mirror and got bored, A.O.10-1 proceeded to sit and wait, until the effects of 3580-a had began to start. He started talking erratically and started clawing at its body. Then A.O.10-1 started to reach for itself and starting clawing at its cardboard. Before and extensive damage could be in place, Dr. Lux had intervened, stopping the experiment and giving the order for a class-A sedative to be sprayed in the room. After taking off 3580-a and giving A.O.10 a new subject, the effects of the SCP had seemed to stop immediately. The new A.O.10-1 reports that he felt like being in “teenage hell” and wishes to be back in his chambers **[Requisition: Granted]**. The old body of A.O.10-1 was incinerated and 3580-a has to be transported back to SCP site- **[Redacted]**

Conclusion:

3580-2 appears to affect sentient anomalous objects as well, albeit with a smaller effect.
